

Tele Vue DioptRx™, Your Prescription for Better Viewing

When attached to any of the following long eye relief Tele Vue eyepieces, DIOPTRX™ compensates for your eyesight astigmatism. Most of these eyepieces have long eye relief for eyeglass wearers, so simply adding DIOPTRX™ to replace your eyeglasses should leave you with comfortable eye relief. DIOPTRX™ corrects astigmatism only, since focusing compensates for your power correction.

O.S. (Left eye)	XX	XX	XX

Installation Instructions (Additional technical information is available on our website at: www.televue.com)

- 1) Pull off and save rubber eyeguard from eyepiece.
- 2) While holding lower engraved bottom ring of DIOPTRX™ with one hand, unscrew upper top ring (containing lens and rubber eyeguard) just enough so the assembly slips over the eyepiece top.
- 3) While still holding the lower ring, re-tighten upper ring on DIOPTRX™ so it locks onto the eyepiece, then loosen it slightly so DIOPTRX™ is free to rotate. (Note: you can leave it locked onto Radian and Nagler Type 4 eyepieces because rotation can be done using their "Instadjust" housing.)
- 4) Place the chart on the reverse of this page at a distance so you can view it through your telescope, using your DIOPTRX equipped eyepiece (or use an actual star field). Focus at the center of the field and rotate DIOPTRX™ to optimize the astigmatism correction for the sharpest image you've ever seen. DIOPTRX™ is most effective with large exit pupils. Hint for setting rotation: view a star slightly out of focus, and simply rotate DIOPTRX until star disc appears circular then focus normally.
- 5) Keep the lens cap on, and clean as necessary, just as you would clean any other multi-coated optical glass surface.

For information call 9 a.m. — 5 p.m. ET Monday through Friday: 845 469 4551 or visit www.TeleVue.com.
